

FULL-TIME (M/W/X)

SOFTWARE QUALITY ENGINEER

YOUR TASKS

- Establish structured software quality assurance for desktop and service projects
- Create and maintain a test framework with manual and automatic testing
- Documentation of test results
- Active participation in innovative projects in the field of additive manufacturing/3D-printing

YOUR PROFILE

- You are a team player, independent and flexible, as well as problem-solving orientated and quality-conscious
- You are an avid user of modern programming languages such as C#, Java, etc.
- You have at least 3 years of experience in the field of software testing or quality assurance
- You completed a technical education (HTL/FH/UNI)
- You have experience with testing frameworks e.g. Selenium or Unity Test Framework
- Ideally you are ISTQB certified
- You are interested in additive manufacturing and 3D-printing
- You have very good German and English skills

WE OFFER

- Flexible working hours and independent work in a young team
- Flat hierarchies and a pleasant working atmosphere
- Participation in training classes and conferences
- Technically challenging projects with international customers
- Exciting employee events
- Good coffee and table football

SALARY

The annual minimum salary for young professionals is **43.316 € based on full-time employment** according to IT-collective agreement. **Willingness to overpay** depending on qualifications and experience.

ABOUT CADS ADDITIVE

CADS Additive GmbH, based in Perg, Austria, was founded in 2016 and is a 100 % subsidiary of CADS GmbH. The company's goal is to develop time and performance critical services in the field of additive manufacturing. The core components Additive.Core and Additive.Support can be found in data preparation solutions for 3D-printing and the additive manufacturing of well-known software and hardware providers worldwide.
