

FULL-TIME (M/W/X)

C++ BACKEND

WHAT WOULD YOU DO?

- active participation in innovative projects in the field of additive manufacturing / 3D-printing
- realization and conception of backend services in C++
- become the driving force of innovation for all our products and clients
- bridging gaps between Platforms (Windows and Linux)

WHO SHOULD APPLY?

- you have a systemic way of thinking and architectural design is your passion
- you are motivated and enjoy dealing with a lot of technologies
- communication with your colleagues in different languages (English and German) doesn't scare you
- you care about sustainable interface definition
- you are ambitious and enjoy forging core functionality together
- ideally, you are looking back on 3 years of experience with C++, but it's not a must

WHAT SHOULD YOU EXPECT?

- a crazy bunch of people, skilled and dedicated to their work, but also fun-loving and open-minded for all aspects of life
- a really interesting area of work, with a lot of space for development and self-fulfillment
- the chance that sometimes nerf bullets will fly through the air, the certainty that there will be social gathering after work, and the risk of being whitewashed at a table football game

WHAT DO WE OFFER:

- remote working environment
- flexible working hours and independent work in a young team
- work in an exciting field – additive manufacturing – an established and growing area on the forefront of technology
- flat hierarchies and a pleasant working atmosphere
- participation in training classes and conferences
- technically challenging projects with international customers
- exciting employee events
- good coffee, table football and a lot of fun

TO START WORK:

- beginning immediately

The annual salary will **range from EUR 36.890 to EUR 61.656** gross upon a full-time employment basis.

Willingness to pay more based upon qualifications and experience.

ABOUT US

We, **CADS Additive GmbH**, are on our way to dominate the 3D-printing world with AM-Studio. It is our self-proclaimed prophecy to infect the world through innovation and determination in our products and components, which can be found in well-known additive manufacturing software and hardware providers worldwide. But this is just the start.
