

FULL-TIME (M/W/X) QA-ENGINEER

WHAT WOULD YOU DO?

- take an active role in our development process throughout the whole development lifecycle
- ensure the quality of our products by creating, executing and maintaining manual and automated tests
- interact with the development teams and give them support and guidance for the quality aspects of their work
- become an essential part of our DevOps initiative

WHO SHOULD APPLY?

- being confronted with new technologies and techniques is not a pain, it is a pleasure
- communication with your colleagues in different languages (English and German) doesn't scare you
- there is no question regarding thinking outside of the box, as it is just normal
- quality engineering is not just another buzzword that is used in modern software development, for you quality engineering is the main focus of your work
- a team is only as strong as its weakest link and for you empowering others and supporting them is essential in your daily life

WHAT SHOULD YOU EXPECT?

- a crazy bunch of people, skilled and dedicated to their work, but also fun-loving and open-minded for all aspects of life
- a really interesting area of work, with a lot of space for development and self-fulfillment
- the chance that sometimes nerf bullets will fly through the air, the certainty that there will be social gathering after work, and the risk of being whitewashed at a table football game

WE OFFER:

- remote working environment
- flexible working hours
- flat hierarchies and a pleasant working atmosphere
- participation in training classes and conferences
- technically challenging projects with international customers
- exciting employee events
- good coffee and table football and a lot of fun

TO START WORK:

- beginning immediately

The annual salary will **range from EUR 35.042 to EUR 61.656** gross upon a full-time employment basis.

Willingness to pay more based upon qualifications and experience.

ABOUT US

We, **CADS Additive GmbH**, are on our way to dominate the 3D-printing world with AM-Studio. It is our self-proclaimed prophecy to infect the world through innovation and determination in our products and components, which can be found in well-known additive manufacturing software and hardware providers worldwide. But this is just the start.
